

APRIL 30

Liquid Phase and High Throughput TEM for Guiding the Synthesis of New Organic Materials

Nathan Gianneschi, Northwestern University

MAY 7

Signaling at the Nano-Bio Interface

Bianxiao Cui, Stanford University

MAY 14

Descriptors for the Rational Design of Nanomaterials

Shobhana Narasimhan, Jawaharlal Nehru Centre for Advanced Scientific Research, India

MAY 21

Electric Field Control of Magnetism

Ramamoorthy Ramesh, Lawrence Berkeley National Laboratory

MAY 28

Connecting Quantum Systems Through Optimized Photonics

Jelena Vukovic, Stanford University

JUNE 4

A Hopeless Mess No More: Directly Connecting Structure and Chemistry in Relaxors with STEM

Jim LeBeau, MIT

JUNE 11

Chemistry for the Quantum Revolution

Danna Freedman, Northwestern University

A Joint
Foundry/ALS
Seminar

JUNE 18

Electron Microscopy for Quantum Materials

David Bell, Harvard University
